- Study editing
- Dissemination seminar
- National Conference

Project no 28 Contract no 17/25.05.2006 System of indicators of Romanian social protection

The research theme asked for by the Ministry of Labour, Social Solidarity and Family - MMSSF and the consortium of INCSMPS, the national Institute for Statistics - INS and the Academy of Economic studies - ASE participated to competition and was admitted to contracting.

The applied methodology

The indicators system was built in an integrative manner, after the analysis of the frame and existing indicators, of redundancies, lacks and necessities in this area and through verification of the correspondences with indicators used in the European system. The statistic monograph that was obtained is not the mechanical transposition of the ESPROSS manual in Romania, but it is an innovative approach within the frame of ESPROSS social protection with a number of additional modules specific to the actual situation of the Romanian field and to the activity of MMSSF

Data collection:

- Statistic data
- Study of the scientific literature

Dissemination

- Dissemination seminar
